

it's about knowing

**FORCE**TEN™

This is the way

**EEDO**™

**ROBUST BROWSER-BASED RAPID AUTHORIZING** and processing tools enable rapid content development, while fully supporting advanced strategies such as adaptive learning, scenarios and simulations. ForceTen's™ rapid authoring environment is highly scalable, meaning numerous subject matter experts can develop content simultaneously, significantly reducing time-to-use. Eedo customers typically realize a reduction in development costs of 65% as a result of ForceTen's rapid authoring capabilities. ForceTen's fully object-based content model encourages re-use, dramatically reducing development and maintenance costs.

# content **authoring**

## KEY FEATURES

### Built-In Storyboard Facility

Integrates design and development into a seamless process, reducing time to market and cost of e-learning

### Drag and Drop Course Builder

Rapid creation of courses via an intuitive drag-n-drop interface

### Robust and Flexible Authoring

Subject matter experts can develop rich, interactive learning content without programming skills, including scenarios and adaptive learning

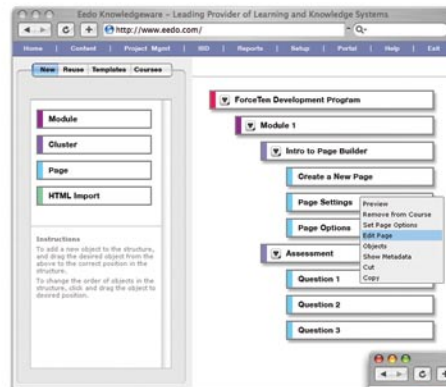

### Software Application Simulation

Develop simulation exercises to speed up deployment of enterprise applications

### Standards-Compliant-Content

Generates SCORM/AICC compliant content for exporting

**Eedo customers typically realize a reduction in development costs of 65% as a result of ForceTen's rapid authoring capabilities.**

### Support for Podcasting

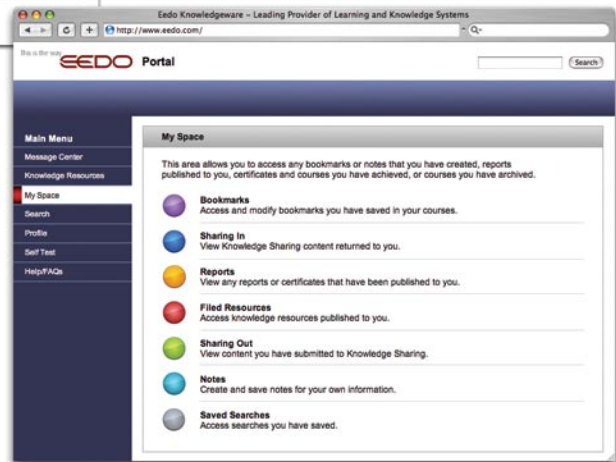

Keep critical messages readily at hand by downloading the audio and video components of training from ForceTen to an iPod Video

### Collaborative Authoring

Browser access to a central database of reusable assets

### Workflow Management

Built-in tools for assigning/managing tasks speed up the development process

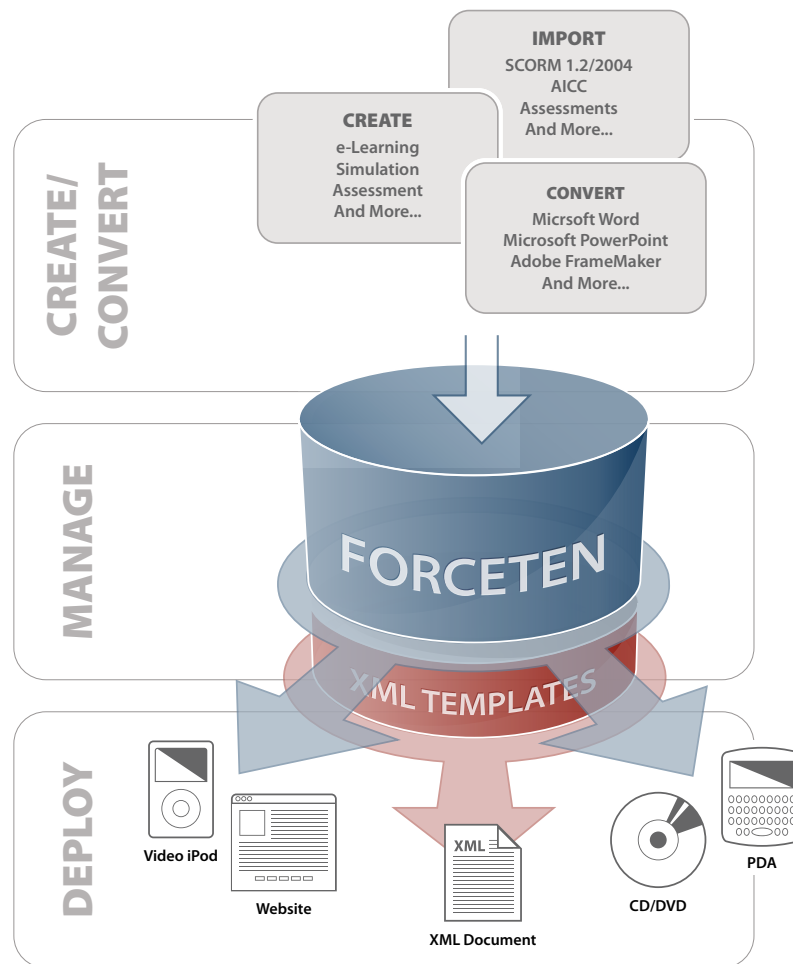

## future proofing your investment

**THROUGH OUR UNPRECEDENTED STANDARDS SUPPORT, FORCETEN** reduces integration costs and ensures the future proof of content by protecting an organizations' investment in knowledge management initiatives today, and investments made in the future. ForceTen is SCORM 1.2 and SCORM 2004 certified, compliant with PENS, AICC, and Section 508, ensuring learners with disabilities are able to access content.

**AT THE CORE OF FORCETEN** is our award-winning Learning Content Management System, enabling you to dynamically deploy and manage content for e-learning, on-the-job support and a searchable knowledge base. Because ForceTen fully integrates development and delivery, content is dynamically deployed, literally at the click of a mouse, without any IT involvement. Dynamic delivery means that content is assembled on demand based on a learner's role within an organization or based on pre or post test assessment results. With the new podcasting support system, audio and video files that have been created for specific courses can be downloaded from ForceTen to an iPod. This allows learners to access their courses when and where they need them.

# learning **content management**

## KEY FEATURES

### Fully Object-Based Content

Enables re-usability, profile-driven delivery and geographic localization of content

### Dynamic Delivery

Content is instantly assembled dynamically from a database, ensuring the latest updated information

### Deployment to Multiple Formats

Instantly deploys content to the ForceTen interface, Website, Learning Management System or for offline use

### Fast, Easy Updating

Updating a single content object instantly updates all courses using that object, simplifying maintenance

### Translation Accelerator

Enables rapid translation of existing course materials into other languages through a streamlined export-translate-import process

## integration into process

**HIGHLY CONFIGURABLE AND WITH AN OPEN ARCHITECTURE, FORCETEN** is easily integrated into an organization's business processes and systems, without the need for customization, reducing implementation cost and simplifying maintenance. Learning events can be initiated based on competency maps and learning plans or driven by performance analytics. ForceTen has been integrated with a number of Human Resource, Performance Management and Learning Management systems.

### **Learning Management/Reporting**

Manage learners, profiles, learning activity and content development with detailed tracking and reporting capabilities

### **Knowledge Sharing**

Systematic sharing of knowledge and best practices with five main functions: ask, submit, approve, subscribe and search

### **Document Management**

Access and manage documents online with a submission, review and approval process

### **Content Conversion**

Quickly convert legacy e-learning content as well as Microsoft documents such as Word, PowerPoint and Excel into Web format

### **Self Service Knowledgebase**

Provides multiple access points to content such as learning objects, help content, tutorials and documents for on-the-job support

## the real time **learning platform**

**FORCETEN ENABLES ENTERPRISES TO IMPROVE EMPLOYEE PERFORMANCE** and productivity by integrating learning into business processes. ForceTen provides employees, partners and customers with push and pull access to knowledge via e-learning, on-the-job support, a searchable knowledgebase and knowledge sharing, all driven from a single database of easily updated, re-usable content objects. Unprecedented standards involvement allows for the future proof of content while ready-to-use portal template designs get you up in running in record time and give developers more options when designing courses. In addition, ForceTen easily integrates with Human Resource, Learning Management and Performance Management systems to initiate learning events based on competency maps, learning plans or, most beneficially, driven by performance analytics. Completely Browser-based and compatible with all IT infrastructures, ForceTen is easy to implement, integrate, manage and scale. Our integrated platform provides a complete set of knowledge transfer tools with the following capabilities:

### **Content Authoring**

### **Knowledge Sharing**

### **Learning Content Management**

### **Document Management**

### **Learning Management**

### **Self Service Knowledgebase**

### **Document Conversion**

### **Simulations**

### **Assessments**

### **Reporting**

### **Workflow**
